Hello!

I'm a software engineer living in the KC area. Dedicated to creating user-friendly websites and applications that are intuitive and easy to use. Passionate about empowering women in the engineering and technology fields.

Kansas City Women in Technology

Mentor | 2019+

Guided first-time coders through basic programming exercises in the Coding and Cocktails program.

Netsmart

Software Engineer | 2018+

Lead development on multiple internal and client-facing applications. Developed applications based on UX designs and mockups. Established long-term working relationships with clients. Provided on-call support and oversaw weekly deployments and maintenance. Mentored new associates and interns. Achieved Mental Health First Aid certification.

Software Engineering Intern | 2017

Worked on an agile development team with daily scrum meetings. Designed and built an application from the ground up. Presented work to executives and entire company.

University of Kansas

B.S. in Computer Science | 2015-2018

GPA of 3.63. Coursework in data structures, algorithm analysis, computer architecture and security, and robotics. Founding member of KU's Women in Computing chapter (2017-2018). Member of the Center for Research Methods and Data Analytics' python workgroup (2017).

Carnegie Mellon University

Mellon College of Science | 2013-2015

General coursework in sciences with a focus on chemistry and an introduction to computer science. Member and recruitment day chair for CMU's Alpha Phi women's fraternity chapter (2014-2015). Team leader for Strong Women, Strong Girls youth mentoring program (2015).
